Re: Variance Request
Summer Wind Subdivision
City of Montgomery

Dear Commission:

Tim Connolly, Montage Partners, LLC (“the Developer”) plans to proceed with construction of approximately 56 acres of land situated along Lone Star Parkway just east of Buffalo Springs Drive. The Developer is requesting the following variances from the City’s 2004 Code of Ordinances:

- Section 78-92: The 2004 Code of Ordinances requires single-family residential developments to have a minimum 75’ lot width and a minimum 9,000 SF lot size. The Developer is proposing to provide 45’ wide lots with sizes ranging from 5,374 to 12,482 SF. The Developer is requesting a variance to allow a 45’ lot width and a minimum lot area of 5,370 SF.
- Section 78-91: The 2004 Code of Ordinances requires that all local access streets have a minimum right-of-way width of 60’. The developer is proposing the minimum ROW width to be 50’.

Enclosed you will find the request for variance as submitted by the engineer for the development. It is important to note that Developer is proposing more than the minimum required compensating green space for the lot size variance. We offer no objection to the variances as requested.

Approval of the requested variances does not constitute plan approval and only allows the Developer to further refine the proposed plat and site plans, which will require the full review and approval of the City

If you have any questions or comments, please do not hesitate to contact me or Chris Roznovsky.

Sincerely,

Katherine Vu, PE
Engineer for the City

RE: Variance request for Summer Wind regarding requirements for minimum lot area, lot width, and ROW

The subject tract is a 56-acre property along Lonestar Loop just east of Buffalo Springs drive and is within Mr. Lefevre's Planned Development District, which allows the development to fall under ordinance(s) published in 2002. According to Sections 78 and 98 of the City of Montgomery Code of Ordinances, residential lots are required to have a minimum lot width of 75' and minimum lot size of 9,000 square feet (SF). The ROW requirement in this ordinance for local streets are required to be 60' wide. The requested proposed development will consist of approximately 211 single-family residential lots, with lot sizing ranging from 5,374 SF to 12,842 SF, 45' x 120' lot average with 50' ROWs. We feel that variance requests are warranted for the following reasons:

- The 2002 ordinance, Section 78-99 requires that any lots below the minimum standard to have compensating green space. The proposed development will have lots below the minimum and is proposing several pocket parks, amenity pond and open space to accommodate the compensating green space requirement. A summary of the lots below the minimum and total of the compensating green space is attached. The required compensating green space is 582,743 SF and we are proposing 627,635 SF.
- The residential market over the last 12 months have increases substantially, which has increased home prices by 30%, if not more in certain areas. With the rise of home prices and interest rates, much of the population is being priced out and are not able to afford to purchase homes. The proposed development intends on building good quality but also affordable homes in the price range of \$275,000 to \$325,000. To be able to produce this type of market, the lots size needs to be reduced to fit the market. 60' + wide lots are in excess of \$500,000 in most areas, which would not be the demand for the area.
- The proposed development will consist of 211 homes with an average home price of approximately \$325,000, which will be able to generate almost \$70,000,000 worth of tax base within the City.
- The 50' ROW is the typical ROW that has been used for most of the curb and gutter streets in the City of Montgomery and you are able to fit water, sewer, storm and the required street width within the 50' ROW without any issues. The 50' ROW is what the current ordinance requires.

It is for the above-mentioned reasons that we feel the variance requests should be considered and approved.

Thank you,

Jonathan White, PE
