

Good evening members of the Planning and Zoning Commission, we are asking you to allow us to have windscreens around the decking of our building at 14335 Liberty street for the purpose of cutting back on the cold weather for the enjoyment of our patrons. We are asking for this during the months of October through March only. We have chosen the best possible screens available and ones that match the color of our building to help blend and keep within the look of our establishment.

As you know most of our seating space is outside and without being able to cut back on the cold weather would be at the detriment of our business so we ask for your consideration to allow us to us these windscreens for the intended purpose and time until one day we may be able to come to a more permanent solution that we could agree upon.

Thank you,

Krawfish Kai

Ryan Routt
