

Montgomery City Council
AGENDA REPORT

Meeting Date: November 12, 2024	Budgeted Amount: See Below
Department: Administration	Prepared By: Maryann Carl

Subject

Consideration and possible action approving projects to be funded from the American Rescue Plan Act funds.

Recommendation

Approve the two projects presented below.

Discussion

As a recap, the City received a total of \$337,654.89 in ARPA funds and these funds must be obligated by December 31, 2024, or the City will be required to return the money to the Federal Government.

City staff and engineers have been working with GrantWorks to identify Capital Projects from our current list that meet the eligibility criteria for funding under the American Rescue Plan Act.

The following two projects under Priority 2 of the attached 2025 CIP Snapshot meet the criteria and are presented for approval:

- **College Street Drainage Improvements, estimated cost of \$250,000**
These ARPA funds will be used to construct a drainage system along the City of Montgomery's College Street. With the impact of flooding along the street, the City will be able to effectively channel the flow of flood water with newly constructed drainage ditches. As both an emergency relief mitigation response and general government service, this project will provide the City's residents with floodwater control and abatement.
- **Water Plant No. 3 Booster Pump Addition, estimated cost of \$125,000**
These ARPA funds will be used to purchase and install a booster pump at the City of Montgomery's Water Plant No. 3 to improve the water pressure within the City's water system. As a general government service and infrastructure need, the booster pump will improve the delivery of drinking and potable water to the City's water system.
