

City of New Meadows Grass and Weeds Report

June 18, 2022

We waited until later in the month to do the Grass and Weeds tour this month due to the excessive rain which kept many from getting out and mowing and weed-eating.

I was SUPER IMPRESSED by the number of people who had taken care of their grass and weeds. There were only 8 properties that had grass and weeds needing attention. Those property owners have been sent a letter letting them know they must have the properties mowed and/or weed-eated before the 10th of July or we will hire a contractor to bring the property into compliance.

We will go back to the regular schedule in July and give the abatement contractor the location of any properties out of compliance when we do our grass and weeds tour on July 11th.
