

CITY OF NEW MEADOWS MAYOR'S REPORT

July 26, 2021

The first round of junk letters went out by July 15th. The properties that received a letter will be reviewed on August 15th. If the junk has not been taken care of or they have not contacted City Hall to make arrangements to get their properties cleaned up, they will be cited as per the public nuisance ordinance. Landowners of the properties were also notified.

I sent out several thank you letters to express appreciation to those who have cleaned up their property in town. I will continue to recognize the efforts of residents to improve their property.

We are headed into budget time. Dana is working to make the process streamlined and understandable. There are some changes in the process due to legislation changes. The council will be updated on these changes.

I am continuing to work on ways to get the community more aware of the City's activities and encourage involvement. We need the continued investment of local volunteers in order for the city to be successful. We also need to keep residents aware of the work we are doing on their behalf.

I am finishing up the employee evaluations for all City Staff. From this point on, the annual staff evaluations will be scheduled to take place in July of each year.

I have been having conversations with local individuals regarding possibilities for the City's Park. Many of the ideas offered are extremely creative and it is apparent that locals think about their community. I will be presenting their input to the City Council for review and discussion in coming weeks.

"Community is about doing something together that makes belonging matter." Brian Solis
