

## **Tiny Home Questions for Council Consideration**

1. Current city code states that the minimum square footage for a home is 800sf. Both tiny home and park model definitions have a maximum square footage of 400sf. Do you wish to acknowledge dwelling units that are 401-799sf?
2. Can multiple tiny homes / park models be connected to a single water/sewer hookup if on a single property?
3. Per city code, if 5 or more RVs or mobile homes are placed on a property, it is considered a mobile home / RV "PARK." Should the same apply to tiny homes / park models?
4. How will building codes apply to tiny homes / park models (such as snow load)?
