**Subject: 2025 ANNUAL INSPECTIONS – CATHODIC PROTECTION SYSTEM
PORT OF NOME FUEL LINES**

Dear Lucas:

Norton Corrosion Limited (NCL) would like to remind you that the cathodic protection system installed to protect the subject structure from corrosion is due for its Annual Inspection. NCL recommends these inspections to ensure proper cathodic protection system operation and lower system operating costs. Our records indicate your last inspections were performed by NCL on July 18, 2024.

Your Annual Inspection includes all necessary tests, any minor adjustments that may be required, and a written report detailing raw data collected, our observations, conclusions, and recommendations. NCL would be pleased to perform this work for a lump sum fee of \$6,655.

Your returned authorization can serve as our Notice to Proceed with this work. If you prefer to call, please contact us at 425-483-1616 or 800-426-3111 and we will be pleased to help you. NCL will then add your inspections to our Engineering Schedule and contact you to schedule your inspections. Please note that our offer is based upon scheduling your inspections with others in the area to keep our costs (and yours) under control.

If you have any questions regarding our scope of services, do not hesitate to call. We thank you in advance for the opportunity to continue as your Corrosion Control expert.

Sincerely,

Phil Goodwin
