

Greetings Sirs/Ma'ams,

My name is Huhnkie Lee and I'm running for 2022 US Senate as an independent Alaskan. Thank you for your service for the Nome community and thank you for your kind time for me this evening.

In my spare time, I study Alaskan history from books and internet and I've learned that people found gold in sandy beaches in Nome back in early 1900s. Of course even before the gold mining era, I learned the Alaskan Native history goes back like 20,000 years, when they crossed the land bridge over the Bering Sea.

I hope one day there would be roads to Nome from Wasilla, where I live. There are people like me who want to far-away all-Alaskan towns like Nome. But we don't have money to sail a ship or fly in an airplane, so we need roads so that we can drive to Nome.

To build roads, we need money. To make money, we need to sell things that sell. We got gold in Alaska. For instance, people already found gold in Pebble Mine in Bristol Bay and there are international investors ready to mine gold there. All they need is our Alaskan approval.

If Alaskans show their support for Pebble Mine, that will have impact on federal regulators and decision makers. I think that's about 3 minutes that I'm allowed to talk in this meeting as a private citizen.

Thank You, Ladies and Gentlemen and God Bless Nome, Alaska-

--Huhnkie Lee
