1. **THE UNIVERSITY OF CHICAGO**

Chicago Department of Public Landmarks has recently announced an effort to make its database of historic buildings and neighborhoods available to the public. The department's database is a computerized listing of historic buildings and neighborhoods in the city, and is available to the public through a computer terminal located in the city's historic district. The database is a computerized listing of historic buildings and neighborhoods in the city, and is available to the public through a computer terminal located in the city's historic district. The database is a computerized listing of historic buildings and neighborhoods in the city, and is available to the public through a computer terminal located in the city's historic district.
