RE: No Rise Certification for Integris Norman Primary Care Clinic  
2361 36<sup>th</sup> Avenue NW, Norman, Oklahoma 73072

Dear Mr. Murphy,

The proposed development of Integris Norman Primary Care Clinic involves the installation of a small diameter storm culvert draining into Brookhaven Creek.

There is no fill anticipated in the floodplain within the construction limits; therefore, no rise in the base flood elevation (BFE) is expected to occur on the property or adjacent properties.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lindsay M. Flesher'.

Lindsay M. Flesher, P.E.
