

Summary of Project at **618 N Crawford**

The Homeowner wants to build a concrete driveway to connect his approach to his garage in the back. He wants to build an 8' wide driveway 71' long. He is unable to build a 10' wide driveway because there is an existing fence that tapers down to 8'8" wide at the skinniest point between house and fence. We are requesting a variance to the 10' wide minimum so he can build this driveway to connect his approach and garage like other homes in this area.
