

CITY OF NORMAN, OK STAFF REPORT

MEETING DATE: 6/23/2026

REQUESTER: ANDREW BRUEHL, UTILITIES SUPERVISOR

PRESENTER: MICHAEL PRICE, UTILITIES MANAGER

ITEM TITLE: CONSIDERATION OF AWARDING, ACCEPTANCE, REJECTION, AMENDMENT, AND/OR POSTPONEMENT OF BID 2526-47: SUBMITTED BY JARRED CHANDLER DOZER & EXCAVATION IN THE AMOUNT OF \$139,375 FOR RESIDUALS HAULING SERVICES FOR THE WATER TREATMENT FACILITY

BACKGROUND:

Bids were advertised in the newspaper and on May 21, 2026, bids were opened for Bid Number 2526-47 for residuals hauling services. The Water Treatment Facility produces approximately 35,500 cubic yards of residuals annually, and approximately 3,000 cubic yards of clay lining material are hauled each year. Bid pricing for these two items was used to evaluate and select the lowest and best bid, as they represent the majority of the annual expenditures for these services.

Residuals hauling services will be utilized on an as-needed basis throughout Fiscal Year 2026-2027 (FYE 2027). Funds in the amount of \$158,990 have been budgeted in the Water Fund – Water Treatment Plant – Business Services – Residual Removal (Account No. 31955234-44121) for these services.

DISCUSSION:

One (1) bid meeting all specifications was received from Jarred Chandler Dozer & Excavation. Based on estimated annual hauling quantities established from historical usage, the evaluated bid amount totaled \$139,375, which is unchanged from the prior year's contract pricing.

RECOMMENDATION:

Services will be provided throughout FYE 2027 on an as-needed basis. Staff has reviewed the bid and found it to be in proper form and responsive to the bid specifications. Based on the above information, staff recommends awarding Bid 2526-47 to Jarred Chandler Dozer & Excavation at a price \$139,375.00.
