RE: No Rise Certification for
Summit Valley Addition Section 4
Norman, Oklahoma
SMC #6211.04

Dear Mr. Sturtz,

The development of Summit Valley Addition Section 4 will provide improvements associated with a new residential development. The site was previously analyzed and designed to drain directly into Dave Blue Creek as part of the Watershed Hydrology Report for Summit Valley Addition, dated May 17, 2004. Per said report, there will be no rise in the base flood elevation (BFE), or adverse impact will occur on the property or any adjacent properties, upstream or downstream.

Sincerely,
SMC Consulting Engineers, P.C.

Preston Caldwell, P.E.
