James Garner Phase 2

Project Summary

- James Garner Avenue (JGA) creates a new, uninterrupted corridor into to downtown Norman from Flood Avenue. This phase stretches from just north of Acres street, adjacent to the new library, north over Robinson Street to a connection with Flood Avenue north of the existing water tower.
- Construction will consist of a new two-lane divided street, a new bridge over Robinson Street and a multi-lane roundabout intersection at Flood Avenue.
- The new corridor will also construct and re-align Legacy Trail to improve pedestrian and bicyclist safety.
- Project will provide an alternative route to downtown in an effort to relieve traffic congestion within nearby neighborhoods and on both Flood Avenue and Porter Avenue.
