

CITY OF NORMAN, OK STAFF REPORT

MEETING DATE: 01/14/2025

REQUESTER: Joseph Hill, Streets Program Manager

PRESENTER: Scott Sturtz, Interim Director of Public Works

ITEM TITLE: CONSIDERATION OF APPROVAL, REJECTION, AMENDMENT, AND/OR POSTPONEMENT OF CONTRACT K-2425-79: A CONTRACT BY AND BETWEEN THE CITY OF NORMAN, OKLAHOMA, AND TFR ENTERPRISES INC. AWARDED PRE-POSITION AGREEMENT FOR DISASTER DEBRIS REMOVAL SERVICES.

BACKGROUND:

Natural disasters commonly occur in Oklahoma including wind storms, ice storms, flooding and tornados. Each event has its own unique debris removal and disposal requirements.

When faced with natural disasters, planning is the key to preparedness. A Debris Management Plan ensures a quicker and more thorough and calculated response to a disaster. It also establishes a strategic framework for providing debris removal assistance in support of a Presidentially-declared emergency or major disaster and helps qualify a city for additional Federal Emergency Management Agency (FEMA) dollars, in some cases. This additional assistance is explained in sections 403 (Essential Assistance) and 407 (Debris Removal) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (hereafter, the Stafford Act), 42 U.S.C. 5121-5206, and implementing regulations at 44 CFR Part 206.

The attached table, Attachment A, is a listing of all 18 of the major weather events in Norman since 2007. The total City expenditure for debris removal for all of the events is roughly \$15,404,395.00. Nine (9) of these events required contracting services to aid in the debris removal. Of these events, the City has received reimbursement of \$10,670,643 or 75% of the total \$13,586,270 from FEMA and the Oklahoma Department of Emergency Management (OEM).

On November 25, 2008, City Council approved Contract K-0809-101 with Beck Disaster Recovery, Inc. (BDR) in the amount of \$64,949 to prepare the City's first-ever Debris Management Plan. On September 8, 2009, City Council approved the plan.

On December 22, 2009, City Council awarded Pre-Position Contracts to T.F.R. Enterprises, Crowder Disaster Recovery, and DRC Emergency Services for Disaster Debris Clearance and Removal Services.

On November 19, 2014, City Council awarded Pre-Position Contracts to T.F.R. Enterprises, Ceres Environmental Services, Inc., and TAG Grinding Services, Inc., for Disaster Debris Clearance and Removal Services.

On January 28, 2020, City Council awarded Pre-Position Contracts to T.F.R. Enterprises, D & J Enterprises, Inc., and Custom Tree Care, Inc., for Disaster Debris Clearance and Removal Services.

DISCUSSION:

The Debris Management Plan recommends that the City have a pre-positioned agreement with 3-5 debris removal companies. This is a FEMA requirement for reception of federal aid funds. These are stand-by agreements with no associated value. For bid purposes, a sample event was created with quantities for a standard debris removal event. The bid quantities listed in the bid schedule were approximately the same as the final quantities of the December 2007 ice storm. Some additional bid items were added which would be associated with a tornado event such as removal of white goods and abandoned vehicle removal. A bid item for drainage channel debris removal was also added. Using this sample event, bids are tabulated for comparison of the bidders. The agreement does not have a value until a work order is developed and a "Notice to Proceed" is issued by the City Manager, for an amount based on the estimated quantities of a specific disaster. Typically, at that point, the Mayor has officially declared the weather event to be a local emergency. The City of Norman will be prepared for the next disaster by having the executed agreements in place and will be able to start debris removal more efficiently.

The City of Norman executed agreements with three national companies in the first pre-position contracts awarded for Disaster Debris Clearance and Removal Services in December of 2009. These pre-position contracts were originally effective for three years with the option for two one-year extensions. It is important to have multiple pre-position contracts in the case of a particularly devastating disaster requiring more than one contractor, or the absorption of one company by another, or a company proposing drastic increases in their fees during the extension process.

The City of Norman advertised Bid Documents and Specifications in November, 2019 to once again establish pre-position contracts should a natural disaster occur. These contracts executed in 2020 and will expire on January 28, 2025.

The City of Norman once again advertised Bid Documents and Specifications in October and November, 2024 to again establish pre-position contracts should a natural disaster occur. On November 14, 2024, six (6) bids were received for "Disaster Debris Clearance and Removal Services" from nationwide providers. Staff has selected the three (3) lowest qualified bidders utilizing metrics for best overall value as follows:

- 1. T.F.R. Enterprises, Inc., Leander, TX \$10,710,792
- 2. Southern Disaster Recovery, LLC., Greer, SC. \$12,917,098
- 3. Looks Great Service of MS, Inc., Columbia, MS. \$13,228,601

Staff recommends that the City enter into a pre-positioned agreement with each of the three (3) lowest qualified bidders. In the event of a disaster, staff will call the lowest bidder and if they cannot respond within the time frame listed in the agreement, staff will call the second low bidder to respond and so on. The contractor shall attend a Debris Management Kickoff Meeting with the City Manager (City Debris Manager) and other City staff no later than 72 hours following the disaster (or at such time that it is safe to return to the city). The contractor shall mobilize at least 50% of the debris clearance fleet necessary for project completion within 72 hours of the Debris Management Kickoff meeting. One-hundred percent of the fleet necessary for project completion shall be present within seven (7) working days following the issuance of a Notice to Proceed from the City. The selected contractor will be required to post a Performance and Payment Bond in the amount of 100% of the estimated contract price within 10 days after the issuance of the Notice to Proceed by the City. The City reserves the right to adjust the estimated contract price at the time of the event based on the size, severity and type of debris generating event. The bond shall continue throughout the contract execution period when the City Manager issues a Notice to Proceed, until such time as the scope of work contained in the contract is completed as determined by the City Manager.

The pre-positioned agreements will be effective for a period of three (3) years with the option for Council to extend the contract for two (2) additional one-year periods upon mutual agreement of both parties. If agreement renewal is agreed upon by both the City and the contractor, price adjustments for set rates will not exceed the average of the Construction Cost Index (CCI) during the 12-months prior to renewal or 5%, whichever is less. Bid prices are locked in for a 3-year period. All work set forth in the scope of work must be approved by personnel authorized by the City Manager.

RECOMMENDATION:

Staff recommends approval of contract K-2425-79 with TFR Enterprises Inc. awarding pre-position agreement for disaster debris removal services
