ZONING BOARD OF APPEALS STAFF REPORT

FOR: City of Novi Zoning Board of Appeals

MEETING DATE: October 13, 2026

REGARDING: **41100 Twelve Mile Road #50-22-12-351-053 (PZ26-0054)**

BY: Alan Hall, Deputy Director Community Development

I. GENERAL INFORMATION:

Applicant

Armenian Church and Cultural Center

Variance Type

Dimensional Variance

Property Characteristics

Zoning District: this property is zoned Residential Acreage (R-A)

Location: east of Meadowbrook Road, north of Twelve Mile Road

Parcel #: 50-22-12-351-053

Request

The applicant is seeking variances from the City of Novi Zoning Ordinance Section 3.1.1.D to permit an architectural monument height of 62.83 ft. (35 ft. maximum required, variance of 27.83 ft.); and Section 4.19.2F for the dumpsters to be located in the side yard whereas dumpsters are permitted only in the rear yard setback.

II. STAFF COMMENTS:

The applicant is seeking (2) dimensional variances:

(The applicant is re-applying for the same two variances that were previously approved)

- 1) A variance to allow a 27.83-foot increase in maximum height for an architectural monument.*
- 2) A variance to allow a dumpster to be in the side yard.*

History:

On November 14, 2017 and July 11, 2023 a side yard variance for the dumpster was granted – expired.
On November 10, 2020 and July 11, 2023 a monument height of 62.83' was granted – expired.

III. RECOMMENDATION:

The Zoning Board of Appeals may take one of the following actions:

1. I move that we **grant** the variance in Case No. **PZ26-0054**, sought by _____, for _____ because Petitioner has shown practical difficulty requiring _____.

(a) Without the variance Petitioner will be unreasonably prevented or limited with respect to use of the property because _____.

(b) The property is unique because _____.

(c) Petitioner did not create the condition because _____.

(d) The relief granted will not unreasonably interfere with adjacent or surrounding properties because _____.

(e) The relief is consistent with the spirit and intent of the ordinance because _____.

(f) The variance granted is subject to:

1. _____.
2. _____.
3. _____.
4. _____.

2. I move that we **deny** the variance in Case No. **PZ26-0054** sought by _____, for _____ because Petitioner has not shown practical difficulty requiring _____.

(a) The circumstances and features of the property including _____ are not unique because they exist generally throughout the City.

(b) The circumstances and features of the property relating to the variance request are self-created because _____.

(c) The failure to grant relief will result in mere inconvenience or inability to attain higher economic or financial return based on Petitioners statements that _____.

(d) The variance would result in interference with the adjacent and surrounding properties by _____.

(e) Granting the variance would be inconsistent with the spirit and intent of the ordinance to _____.

Should you have any further questions with regards to the matter please feel free to contact me at (248) 347-0417.

V. VARIANCE

A. VARIANCE (S) REQUESTED

☒ DIMENSIONAL ☐ USE ☐ SIGN

There is a five-(5) hold period before work/action can be taken on variance approvals.

B. SIGN CASES (ONLY)

Your signature on this application indicates that you agree to install a **Mock-Up Sign** ten-(10) days before the schedule ZBA meeting. Failure to install a mock-up sign may result in your case not being heard by the Board, postponed to the next schedule ZBA meeting, or cancelled. A mock-up sign is **NOT** to be actual sign. Upon approval, the mock-up sign must be removed within five-(5) days of the meeting. If the case is denied, the applicant is responsible for all costs involved in the removal of the mock-up or actual sign (if erected under violation) within five-(5) days of the meeting.

C. ORDINANCE

City of Novi Ordinance, Section 3107 – Miscellaneous

No order of the Board permitting the erection of a building shall be valid for a period longer than one-(1) year, unless a building permit for such erection or alteration is obtained within such period and such erection or alteration is started and proceeds to completion in accordance with the terms of such permit.

No order of the Board permitting a use of a building or premises shall be valid for a period longer than one-hundred and eighty-(180) days unless such use is establish within such a period; provided, however, where such use permitted is dependent upon the erection or alteration or a building such order shall continue in force and effect if a building permit for such erection or alteration is obtained within one-(1) year and such erection or alteration is started and proceeds to completion in accordance with the terms of such permit.

D. APPEAL THE DETERMINATION OF THE BUILDING OFFICIAL

Monument Height Variance Submittal (MH)
City of Novi Zoning Ordinance 3.1.1.D & 4.10.5

REVIEW STANDARDS DIMENSIONAL VARIANCE

The Zoning Board of Appeals (ZBA) will review the application package and determine if the proposed Dimensional Variance meets the required standards for approval. In the space below, and on additional paper if necessary, explain how the proposed project meets each of the following standards. (Increased costs associated with complying with the Zoning Ordinance will not be considered a basis for granting a Dimensional Variance.)

Standard #1. Circumstances or Physical Conditions.

Explain the circumstances or physical conditions that apply to the property that do not apply generally to other properties in the same zoning district or in the general vicinity. Circumstances or physical conditions may include:

- a. Shape of Lot.** Exceptional narrowness, shallowness or shape of a specific property in existence on the effective date of the Zoning Ordinance or amendment.
☒ Not Applicable ☐ Applicable If applicable, describe below:

and/or

- b. Environmental Conditions.** Exceptional topographic or environmental conditions or other extraordinary situations on the land, building or structure.
☐ Not Applicable ☒ Applicable If applicable, describe below:
See Attached.

and/or

- c. Abutting Property.** The use or development of the property immediately adjacent to the subject property would prohibit the literal enforcement of the requirements of the Zoning Ordinance or would involve significant practical difficulties.
☒ Not Applicable ☒ Applicable If applicable, describe below:

Standard #2. Not Self-Created.

Describe the immediate practical difficulty causing the need for the Dimensional Variance, that the need for the requested variance is not the result of actions of the property owner or previous property owners (i.e., is not self-created).

See Attached.

Standard #3. Strict Compliance.

Explain how the Dimensional Variance in strict compliance with regulations governing area, setback, frontage, height, bulk, density or other dimensional requirements will unreasonably prevent the property owner from using the property for a permitted purpose, or will render conformity with those regulations unnecessarily burdensome.

See Attached.

Standard #4. Minimum Variance Necessary.

Explain how the Dimensional Variance requested is the minimum variance necessary to do substantial justice to the applicant as well as to other property owners in the district.

See Attached.

Standard #5. Adverse Impact on Surrounding Area.

Explain how the Dimensional Variance will not cause an adverse impact on surrounding property, property values, or the use and enjoyment of property in the neighborhood or zoning district.

See Attached.

Novi, Michigan
City File No. JSP 17-0037

Review Standards - Dimensional Variance

Standard #1 – Circumstances or Physical Conditions

- a. Shape of Lot - Not Applicable
- b. Environmental Conditions - Applicable

This project introduces an extraordinary type of structure. The proposed Memorial Monument is an atypical type of structure that is not found in any of the other properties in the general vicinity. The monument would be located between the buildings, within the Armenian Genocide Memorial Courtyard. It is designed as an architectural element with both copper and stainless-steel panels. The monument will be illuminated upward from the base. The structure is 6'-0" x 8'-0" in plan and rises to 62.83 feet (1915 cm). This height signifies the year the Armenian Genocide began, 1915. The design and creation of this monument is part of the Armenian Culture and Religion. Please see owner's narrative (attached) for a detailed description of the meaning behind the monument's height and design.

- c. Abutting Property - Not Applicable

Standard #2 – Not Self-Created

The need for the Dimensional Variance is based on a desire to create a meaningful and memorable Memorial Monument, not a result of the property owner's self-created site conditions. The inclusion of this monument may be interpreted to fall under the exceptions stated in the RA District Building height limits, whereas, the ZBA may specify the height limit for such a structure.

Standard #3 – Strict Compliance

The Dimensional Variance provides for the creation of a meaningful and significant monument within Michigan. This Memorial Monument commemorates the Armenian history, culture, and religion for both the Armenian Community and the greater community as a whole. The monument's proposed height of 62.83 feet (1915 cm) corresponds to the historical date of 1915, when the Armenian Genocide began. Please see owner's narrative (attached) for a detailed description of the meaning behind the monument's height and design.

Standard #4 – Minimum Variance Necessary

The Dimensional Variance requested is the minimum dimension to give meaning to the memorial structure's height. That being said, the exact height proposed, 62.83 ft (1915 cm), corresponds to the historical date of 1915, when the Armenian Genocide began. This specific dimension gives meaning to the height of the memorial structure based on the history of the Armenian Nation. Please see owner's narrative (attached) for a detailed description of the meaning behind the monument's heights and design.

Standard #5 – Adverse Impact on Surrounding Area

The impact of the Dimensional Variance will be minimal to the surrounding properties due to the characteristics of the existing large site and the location of the proposed monument within the site. The site consists of a varied terrain, a large amount of existing tree growth, with a significant amount of added new landscape. The submitted renderings and drawings show the sloping site sections and the additional planting that will occur along the property lines. On the site plan, the nearest neighbor is noted as approximately 297'-0" distant and sloped away from the proposed monument location. The proposed 62.83' (1915cm) monument structure will be located within the Memorial Courtyard, which is located centrally to the entire site. This greatly exceeds the further stipulation that "the height of any such structure shall not be greater than the distance to the nearest property line." See the submitted Overall Site Plan for the proposed location of the monument and the associated distance from each property line. The proposed lighting for the monument will be located on the base of the structure and focused upward onto the structure. It will not be directed toward any of the adjacent properties at any time. The monument will be illuminated for a limited amount of time per day. The lighting system can be controlled and altered seasonally, as needed.

Armenian Memorial Monument – Owner's Narrative

The Genocide of the Armenian nation by the Ottoman Turkish government started in 1915, under cover of World War I. By 1920, one third of all Armenians, 1.5 million men, women and children, had been savagely killed in the first Genocide of the 20th century, the first state-planned and implemented annihilation of a people. The Anatolian Plateau was emptied of its Armenian population, casting the survivors from their home of 4,000 years into Diasporan exile unto far-away shores. The story of the Armenian people is a story of tragedy, but it is also a heroic story of strength and survival. The Armenian Diaspora today is spread across the world, including Novi, MI; Armenians have made important contributions in all fields of human endeavor; and the State of Armenia is a testament to the world of this nation's will and spirit.

The memorial monument we propose is to commemorate this history. Its two halves refer to the nation lost in the killing fields of the Genocide, but also to the nation that survived as a global community and in Armenia. The light between the two halves that shines into the skies is a

reflection of the undying and striving spirit of a people. The height of the memorial monument is a reference to the starting date of the Genocide. At 62.83 ft. (62' 9.94"), it is equal to 1915 centimeters.

The memorial monument is to provide a moment for Armenians to grieve, reflect, reconnect and be inspired by all that this nation has lost and has achieved. It is also a memorial for non-Armenians, for the residents of Novi and for Michiganders, to learn of an important part of human history, to realize how Genocides can be organized, and to better understand their Armenian neighbors and others who have lived through similar experiences.

For these purposes, the base of the memorial monument will include a brief history of the Armenian Genocide, as well as a brief history of the Armenian Diaspora and State of Armenia. There will also be mention of when Armenians first established communities in Michigan.

The sides of the memorial monument, up to a height of eight feet, will be etched with the names of all the villages, towns and districts where Armenians lost their lives during the Genocide. The path to the memorial monument will be bricked, and Armenian families will be able to add the names of their lost relatives to these bricks.

REVIEW STANDARDS DIMENSIONAL VARIANCE

The Zoning Board of Appeals (ZBA) will review the application package and determine if the proposed Dimensional Variance meets the required standards for approval. In the space below, and on additional paper if necessary, explain how the proposed project meets each of the following standards. (Increased costs associated with complying with the Zoning Ordinance will not be considered a basis for granting a Dimensional Variance.)

Standard #1. Circumstances or Physical Conditions.

Explain the circumstances or physical conditions that apply to the property that do not apply generally to other properties in the same zoning district or in the general vicinity. Circumstances or physical conditions may include:

- a. **Shape of Lot.** Exceptional narrowness, shallowness or shape of a specific property in existence on the effective date of the Zoning Ordinance or amendment.
☐ Not Applicable ☐ Applicable If applicable, describe below:

and/or

- b. **Environmental Conditions.** Exceptional topographic or environmental conditions or other extraordinary situations on the land, building or structure.
☐ Not Applicable ☒ Applicable If applicable, describe below:
The extensive slope and dense woodland areas of the environment require a more functional location and position for the dumpsters.

and/or

- c. **Abutting Property.** The use or development of the property immediately adjacent to the subject property would prohibit the literal enforcement of the requirements of the Zoning Ordinance or would involve significant practical difficulties.
☐ Not Applicable ☐ Applicable If applicable, describe below:

Standard #2. Not Self-Created.

Describe the immediate practical difficulty causing the need for the Dimensional Variance, that the need for the requested variance is not the result of actions of the property owner or previous property owners (i.e., is not self-created).

The need for the variance would allow the dumpsters to be placed at its closest location to where it will be used. The dumpsters are completely screened with masonry (brick) / landscape and meets all ordinance requirements.

Standard #3. Strict Compliance.

Explain how the Dimensional Variance in strict compliance with regulations governing area, setback, frontage, height, bulk, density or other dimensional requirements will unreasonably prevent the property owner from using the property for a permitted purpose, or will render conformity with those regulations unnecessarily burdensome.

The ordinance required distance places the dumpsters in a woodland area. In its proposed locations, the dumpsters will not be seen as it allows woodlands to exist as they currently are.

Standard #4. Minimum Variance Necessary.

Explain how the Dimensional Variance requested is the minimum variance necessary to do substantial justice to the applicant as well as to other property owners in the district.

In its proposed locations, the dumpsters will provide substantial justice by being close to the building, yet screened to view.

Standard #5. Adverse Impact on Surrounding Area.

Explain how the Dimensional Variance will not cause an adverse impact on surrounding property, property values, or the use and enjoyment of property in the neighborhood or zoning district.

The proposed location will not cause adverse impact on the adjoining property values since it will be completely screened with brick masonry and landscape materials. The brick masonry will be the same materials used on the building and blended into the architecture. The proposed dumpster at the east side of the property is 96.19' from the property line and 471.02' from the south property line. The proposed dumpster at the west side of the property is 140.70' from the property line and 584.28' from the south property line.

Material and Performance Evaluation Sheet

9150 Crown Control Board

The following table is a summary of the material and performance data for the 9150 Crown Control Board. The data is presented in a table format with columns for Material, Performance, and Evaluation. The table is divided into two main sections: Material and Performance. The Material section includes information on the board's construction, materials, and dimensions. The Performance section includes information on the board's electrical characteristics, mechanical properties, and environmental performance. The Evaluation section provides a summary of the board's overall performance and a recommendation for its use.
