

OnSolve CodeRED

Keep Your Community Informed and Safe

Government agencies today face an unprecedented number of man-made events and natural disasters. Each of these events poses a significant risk to operational continuity, as well as employee and public safety. When they occur, people look to agencies for immediate information on how to prepare or respond.

What is OnSolve® CodeRED?

CodeRED helps government agencies keep their communities informed and safe by delivering the right message to the right people at the right time. The intuitive, cloud-based software delivers fast, effective, geo-targeted communications for both crisis events and day-to-day operations. Emergency alerting capabilities allow you to proactively inform people, instill confidence, foster teamwork and improve operational outcomes.

Targeted. Versatile. User-friendly.

With billions of alerts sent annually in over 29 languages and across North America, OnSolve brings a level of unmatched industry expertise that helps agencies protect lives and mitigate the impact of critical events.

Connect quickly by launching mass notifications in seconds from wherever you are located via web, email, text or mobile app to every recipient's preferred device.

Geo-target alerts precisely based on key characteristics, including specific geographic location, to ensure the right people receive the alert.

Automate severe weather warnings based on official bulletins from the National Weather Service® so your community can act quickly.

Why OnSolve

CodeRED was launched in 1996, making OnSolve pioneers in mass notification and alerting, with over 25 years of industry experience. We deliver award-winning products that are scalable, and easy-to-deploy-and-use to keep our customers safe, informed, assured and productive when it matters most.

Speed

Rapidly notify people all over North America at once while simultaneously activating incident response teams and providing real-time analytics.

Relevance

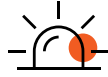

Geo-target alerts to a specific location or customized group of contacts. Deliver alerts to recipients' preferred devices, in their native languages.

Usability

Build alerts via a clean, user-friendly interface that creates a clear, natural hierarchy proven to decrease the time to learn the system, even under strenuous conditions.

When Every Minute Counts™

When any unanticipated event occurs, you need to be able to communicate quickly and accurately with your community. Whether for urgent situations like missing children, evacuations or terrorist attacks or for routine operations, communication is critical.

Emergency Management

- Chemical spills and HAZMAT incidents
- IPAWS alerts
- Police activity and updates
- Severe weather warnings

Law Enforcement

- Missing children or persons
- Evacuation notices
- Lockdown advisories/shelter in place
