**FLOOD MITIGATION SCOPING – PROJECT #08884010**

MSA has completed the flood mitigation report. The report outlines the flooding concerns, a series of different mitigation options, a cost benefit and possible funding opportunities. MSA presented the study and its findings to the Rotary Club on June 10th.

COMMUNITY CHANGE GRANT – PROJECT #08884014

MSA has reviewed requirements for the grant program and identified potential activities to propose in addition to the old railyard site redevelopment. MSA met with the City Administrator and Park Director to discuss potential project ideas that align with the funding program. A list of potential projects have been developed and sent to City Staff to review and prioritize. The project will be publicized at several community events through summer and early fall leading up to application submission.
