Subject: Fayette landfill

So im hearing july 1st fayette landfill is going up on rates.
Are going to be affected by this and whats the rates going to be.
My concern is fayette can just raise the rates without any cities concent.
And the citizens are stuck paying it.
Well I look at it what is driving these cost.
My look at this is missing managed operation and that starts with who is running the landfill itself.
And how much money they have sitting in a account.
Can you look into this.
We pay more on landfill and recycling then Buchanan county.
And surrounding counties.
