

CITY OF ORLAND STAFF REPORT

MEETING DATE: December 2, 2025

TO: Honorable Mayor and Council

FROM: Joe Goodman, City Manager

SUBJECT: **Downtown Water Mains and Central Well Modernization Update**
(Information only)

Staff Update:

During the last Council meeting, staff provided a verbal update on issues with the central well at Lely Park and the need to redirect \$800k in funding from the Walker Street well project due to restrictions within the grant funding source. City Engineer Paul Rabo is coordinating with DWR to confirm that the grant can be used instead for needed upgrades to Orland's Central well and for replacement of aging water mains and valves in the downtown area. Paul is preparing construction drawings for the proposed water main replacements, with construction anticipated to begin in early January and conclude by March 31, 2026.
