

Recommended protective coating for outside wall murals

Kelly Moore paints in Chico carries a protective product made by a company called TSW wearhouse. It's the best on the market.

It's a non-sacrificial clear coating that provides protection against harsh weather and graffiti. Non-sacrificial means it does not adversely affect colors etc.

It comes in a semi-gloss or satin finish and can be applied by a hand pump sprayer or can be applied by brush or roller.

For maximum protection, apply 3 coats. This allows removal of graffiti to be done several times before needing to re-coat.

Cost: \$100. per gallon. One gallon covers 130 to 150 square feet. This means a large area approximately 10 feet by 15 feet in size.
