

**TOWN OF PALMER LAKE
PLANNING COMMISSION - AGENDA MEMO**

DATE: July 2025	ITEM NO.	SUBJECT: Input/Direction re: Pedestrian Walkway Design
Presented by: Town Administrator/Clerk		

Background

As previously reviewed with the Commission, the design has been conducted by GMS Engineering with awarded DOLA planning funds.

Subsequent to the last workshop review of the design, GMS met with CDOT and will not allow diagonal.

Per GMS:

CDOT reps will not allow diagonal parking along Highway 105. They said a few times that it is actually illegal to have diagonal parking off the highway, so we will need to stick with parallel parking arrangements. To keep you all updated, I thought about drafting up the parallel parking and having another meeting with the PC to review one last set of concept drawings before we fine tune the hard design.

Is Planning Commission open to this?

Recommended Action

Provide direction for GMS consultants.
