

**TOWN OF PALMER LAKE
BOARD OF TRUSTEES - AGENDA MEMO**

DATE: September 9, 2021	ITEM NO.	SUBJECT: Update and Authorize Survey for RR Required Fencing
Presented by: Town Administrator /Clerk		

Background

An agreement was previously signed between the Town and BNSF for the pedestrian bridge project, including the installation of a required fence alongside the railroad from the center of the bridge. Details for this requirement are being reviewed by staff and BNSF reps. Measuring distance from the field is unacceptable and a survey is required for the placement of the fence. A preconstruction review is also required to be conducted by BNSF staff. (Drawings included in the agreement are enclosed.)

Town staff requests authorization to move forward with the survey to identify exactly where the fence is required by the agreement.
