Hi Devren –

I just submitted a work order with Public Works for a street sign request.

The problem area is corner of Balder and N 1st. After I dropped my daughter off at school today, I saw a kid pedestrian just about get plowed crossing onto school property by a car flying around the Balder corner. There is no stop sign as you travel on Balder on to southbound N 1st street.

Here is my request: A stop sign (or two stop signs) or at a minimum, a painted pedestrian cross walk connecting the school corner of N 1st across Balder.

Also, I have a map of some needed sidewalks in town from years past.

The most important sidewalk is to connect the library with the school sidewalk at the corner of Dolphin and N 2nd.

What gives with PSG Motors? Can one really park cars long term on the side of the road here? This creates such a blind spot for an area that is visited heavily by pedestrians ...and traveling cars.

This ties into that library area and when thinking what side of the road to put the sidewalk on – the PSG Motors side would be best and also it would meet up with the existing sidewalk at Dolphin and N 2nd – taking into consideration the hospital and the Valker Sted complex.

Let me know if you have any questions -

Thank you for your service, Devren
