Subject: Monday meeting

Good afternoon,

My name is Ayla Dupree.

I'm out of town and unable to make the meeting. The fact this issue seems to be getting bigger despite extensive public resistance and attempts to work together to find an alternative, is inexcusable. You are elected to represent and keep the best interests of your local population in the forefront of your decision making.

I'm once again making it clear we do not support these towers anywhere near our homes. I've personally spoken with 12 real estate agents around the state and will have a packet to present proving that proximity of towers to properties DECREASES property values.

If you refuse to look at health concerns, especially in children. Maybe focusing on the economic impact for the city as well as your residents will be more intriguing to you.

We are not in support of these happens and hope you will seek ways to work with your constituents. We elected you and we provide the income for these government workers. Represent us, not the major companies trying to bully us.

As a side note. I'm putting on record the complete disgust being seen that our local news has chosen not to report on this. There's bias and then theirs chosen negligence.

We will be at meetings going forward and as inconvenient as it is to hear our broken record testimonies, ready yourselves, because you will continue to hear it. Only it will be accompanied by more and more market research and data.

You're there to watch out for us, there's no excuse for what has been happening.

Respectfully,

Ayla
