

Petersburg Medical Center

Infection Prevention Report November, 2024

Workforce Wellness

Performed our annual water risk assessment throughout the facility which protects staff as well as patients in the prevention of waterborne diseases recommended by the CDC.

Community Engagement

Partnering with the Borough of Petersburg in initiating the testing of city water where it enters the building for sufficient residual disinfectant as part of our overall Water Management Strategy.

Sent education out via the LTC newsletter to resident families regarding the implementation of Enhanced Barrier Precautions

Patient Centered Care

Implemented Enhanced Barrier Precautions in Long-term Care

Facility

Implementing a process for standardized testing and logging of eyewash stations with a goal to standardize to one model of eyewash station as much as possible. Purchasing OSHA-compliant signage for all eyewash stations

Financial Wellness

Encouraging and educating staff to make changes in the way that supplies are stocked and stored on carts and in rooms to avoid contamination and subsequent waste.
