Subject: Public Safety Advisory Board Request - Ice Removal on Sidewalks

Dear Jim & Aaron:

I am hoping that the Public Safety Advisory Board takes up the safety issue of persistent ice on sidewalks. I know that locally DOT has limited capability to do snow/ice removal on sidewalks as they have only a few staff members and no overtime, and that they are doing what they can. I also know that private persons and private businesses are doing what they can too. But that still leaves a number of sidewalks in dangerous condition to walk on for weeks/months at a time. This problem does tend to come up every year, and it was recommended to me that the PSAB might be a good group to consider a more holistic long-term solution to the problem.

Thank you for your time and consideration,
Sarah Fine-Walsh
