Subject: Today's agenda on appeal

Good afternoon,

In an attempt to not be redundant, as the case has been made with countless justifications over multiple months and meetings; id like to simply state our opposition to the appeal on tonight's agenda.

At the most basic level I still don't see why anyone could justify another tower to go up within such a close proximity to an existing tower; there still lies the issues many have presented, including the city's own planning and zoning committee.

The assembly members refusal to represent the community members so far in this issue is upsetting. The lack of common sense, true information gathering and collaboration with surrounding communities who faced the same issue is embarrassing. It's no small task addressing this issue and planning and zoning has spent countless hours trying to tackle the issue.

It is my understanding it is their recommendation not to support the appeal. I'm not sure why our local government has worked so hard to accommodate a private conglomerate in a private money-making arena; but this is a good time to lean on the committees who are there to give strong evidence-based recommendation.

Hopefully, this yet again, doesn't fall on deaf ears.

You represent your community, not Tidal Network or tlingit haida. I look forward to seeing what that looks like.

Respectfully,

Ayla Dupree
