Draft Permit Public Notice Period:

Public Notice Start Date: December 14, 2022
Public Notice Expiration Date: January 27, 2023

Permit No.: AKG130000

Permit Name: Aquaculture Facilities in Alaska

Proposed Permit Coverage:

Permit Coverage: DEC proposes to re-issue APDES general permit (permit) AKG130000 to aquaculture facilities in Alaska that discharge process waste and wastewater to waters of the U.S.

Description of Discharges: Aquaculture facilities may discharge a variety of pollutants generated from uneaten feed, fish feces, fish carcasses, cleaning chemicals, and medications. The main pollutants of concern include total suspended solids (TSS), settleable solids (SS), pH, ammonia, dissolved oxygen (DO), and total residual chlorine (TRC). These pollutants have the potential to contribute to a number of adverse water quality impacts, including increased levels of turbidity and residues and low dissolved oxygen.
