OPERATIONS

CLEANING AND MAINTENANCE CLOSURE :: MAY 30th – JUNE 12th

- Volleyball was a great success; 47 participants with Coach Chrystine Lynn and Assistant Coach Callie Bell.
- Met with Daniel Tucker about building an earth oven at Sandy Beach. Working through logistics of building, public use, and maintaining. Thoughts?
- Attended the Office of Boating Safety Educator's Symposium, gained a wealth of information, networked with many great people, brought home great ideas, and have been in Safety Mode ever since.
- Brought the Office of Boating Safety to P&R to teach Julie, Scott, Theresa, Chrystine, Tyler Thain, and I how to instruct Paddle Safety courses, and hosted a public session the following day, with 6 participants. Will be hosting mini courses soon!
- P&R assisted AMSEA with hosting another Drill Conductor course by donating Activity Room and Pool usage in partnership.
- Hosted First Aid/CPR/AED certification courses for Harbor and Library staff.
- Working with school and Op Grad parents for Community Center use on May 27th, following graduation ceremony.
- Julie has been continuing Bingocize, group is having a great time and we look forward to the continuation of this program! She is also keeping the gym side running like a well-oiled machine by coordinating numerous activities, reservations, and club sports.
- Theresa has included a mid-day Aquatic Strength Training class into our Aquatic offerings, great way to get some low-impact training!
- Callie has been looking into trainings to support our youth sports programming alongside Julie and Chrystine.
- Logan is getting our after-school kids into a variety of games on Tues/Thurs/Fridays, while Jessica and Martha gather quite the group of kiddos into their craft classes on Wednesdays.

- Scott is getting another LG course set for late May, and working a mini Open Swim into the pool schedule, hoping that this can help give another opportunity for mid-day pool goers and homeschool students. After hosting another season of Dive In Movies, he is now getting our next round of swim lessons scheduled, look for fliers with information soon!
- Eric has shown interest in survival trainings to assist in our Rainforest Survival Series alongside the rest of the crew, as well as helping our youth weightlifters with technique and proper weight equipment use.
- Daniel is getting the greenhouse prepped for another season of beautifying the town! Theresa has been helping him to get seeds and bulbs ordered and binders with information created. He will soon be getting his seasonal helper to help him get his season in full swing. He has also been taking and investigating new trainings to help him learn more about his trade.
- Julie and I have jumped into another year on the Little Norway Festival Committee, expect another great community event!
- Eric, Theresa, and I are taking the Office of Boating Safety “AK Water Wise” course as our first step in becoming instructors for the course, intending to incorporate our learning into future Rainforest Survival Series events. I have also acquired my Wilderness First Responder certification to further the knowledge base we can share through the survival series events.
- American First Aid Educator, Bridget Verhei, will be coming up on April 10th to recertify Scott, Julie, and I as Lifeguard Instructors (LGI) and certify Theresa, Chrystine, and Tyler Thain as new Lifeguard Instructors! Jessica and Martha will also get certified as Water Safety Instructors! We also have 2 others from Juneau and Haines joining us for their LGI and LGIT recertification. We will be training for 4 long and hard days.
- Our annual Sandy Beach Clean Up is scheduled for Saturday, April 19th, along with Petersburg Rotary, in preparation for the Elks’ Easter Egg Hunt that Sunday. It will be from 11a – 1p. If you are interested in helping, please let us know!
- We are working on our involvement with the upcoming Early Childhood Fair on Saturday, April 26th.

MAINTENANCE

CLEANING AND MAINTENANCE CLOSURE :: MAY 30th – JUNE 12th

- Brought Ketchikan Mechanical to the Aquatic Center to repair a filter pipe that was leaking. Beforehand, we worked with our other departments, but to no avail.

- Welcome Brandon! Brandon joined us as our new Maintenance Technician and is doing great! Very excited to have him on our team! He is finding plenty of projects to keep him busy and getting lots of OTJ training to compliment the wealth of knowledge that he came to us with.
- Brandon is working with Darby to purchase and install new lighting for the lobby and mezzanine. The current lighting has been slowly failing over the years and now needs to be replaced with LED fixtures.
- Scott and Brandon have been working together to investigate an increase in CO2 usage. Due to Scotts findings while talking to other pool facilities and Brandon reaching out to product manufacturers, we will change our pool chemistry to eliminate muriatic acid, saving one unit for emergent purposes only.
- Converjint has FINALLY made it down to provide health checks to ours and the schools HVAC systems. Multiple problems have been identified with our system. We will be receiving our report with repair suggestions and needs, along with pricing. Some repairs will need to be completed soon (thankfully smaller repairs), while some can wait and will be on the expensive side.
- Having had a chance to review progress made on our Aquatic Sewer repair with Manager Giesbrecht and Jody Tow, we will now be proceeding with Respec Engineering to finalize our 100% complete drawings and biddable documents for future Invitation to Bid announcement. This is not going to be a fast moving project.
- Maintenance and Cleaning Closure meetings to discuss and prioritize our facility projects are happening to prepare. We will begin by draining the pool on the 30th. Plans include scrubbing pool basins and pool deck, repainting the leisure pool and gym side hallway, cleaning all air ventilation, working on basketball hoop lift mechanics, top-down scrubbing in every room, LOTS of pressure washing, gym and racquetball floor resurfacing, and installation of new equipment.

This concludes my report, please present any questions you may have.
