**Subject:** Letter to Assembly

### External Email! Use Caution

To Assembly:

I urge you to all vote to approve sending the proposed letter to our DC delegation. A unanimous message from our local elected officials will carry a lot of weight.

Additionally, every decision being made from here out regarding local budgets must include a caveat for catastrophic loss of federal revenue, programs and jobs. If planning does not coincide with the rather routine discussion of budgets, staffing, programs and capitol expenses then we might all be caught with our pants down. How's that for a visual?

But seriously, it's time to push back against extreme political polarization, roll up the sleeves, sharpen those pencils and prepare for the proverbial fork in the road this community might be facing if the Washington administration continues their arbitrary and poorly researched cuts.

Thank you for your service to our magnificent little community.
