

## Mecklenburg County Multi-Jurisdictional Hazard Mitigation Plan 2021 Progress Report – Town of Pineville

### **1** Introduction

To maintain the Community Rating System (CRS) status within the National Flood Insurance Program, **the Town of Pineville** is required to provide an annual progress report on the implementation of each of the mitigation actions the town proposed in the Mecklenburg County Multi-Jurisdictional Hazard Mitigation Plan (HMP). The objective of this evaluation is to ensure that there is a continual and responsive planning process that will keep the HMP plan dynamic and responsive to the needs and capabilities of all the jurisdictions.

The HMP was developed in response to requirements of the Disaster Mitigation Act of 2000. The initial version was completed in 2005 and since then, there have been scheduled updates at five-year intervals. The current version of plan was adopted by the Town Council on October 26, 2020 and approved by FEMA on December 3, 2020. A copy of the current HMP is available from the Charlotte-Mecklenburg Emergency Management website at: <a href="https://charlottenc.gov/EmergencyManagement/Plans/Pages/default.aspx">https://charlottenc.gov/EmergencyManagement/Plans/Pages/default.aspx</a>.

During the development of the 2020 plan, the Mecklenburg County Hazard Mitigation Planning Committee (HMPC) met four times between January 2019 and July 2020. Later meetings were virtual due to the COVID-19 pandemic. A website (<u>http://www.mecknchmp.com/index.html</u>) was created for the 2020 HMP plan update where you can find information about Hazard Mitigation Planning Committee meetings, public meetings, review draft documents, and learn more about the hazards that affect Mecklenburg County.

#### 2 Implementation

The hazard mitigation planning process involves the setting of goals and objectives, the review of community vulnerabilities and capabilities and the development of a series of mitigation actions that when implemented will make the **Town of Pineville** more resilient during natural hazards. The goals and objectives of the 2020 plan includes:

- Identify and implement hazard mitigation projects designed to reduce the impact of future hazard events on existing critical facilities and infrastructure as well as public and private property.
- Conduct education and outreach activities intended to better inform people about hazards and encourage personal responsibility for preparedness and mitigation

- Improve emergency preparedness and response capabilities
- Enact planning and policy measures to reduce the impacts of identified hazards and make future development more resilient to hazards
- •

The implementation status of individual mitigation actions outlined in chapter seven (7) of the plan is summarized in a tabular format in **Section 5 (Review of Mitigation Actions)** of this report.

#### **3** Recommendations

Implementation and maintenance of the plan is critical to the overall success of hazard mitigation planning. It is recommended that the CRS Coordinator work closely with Charlotte-Mecklenburg Emergency Management (CMEMO) and HMPC in all plan monitoring and update procedures to meet CRS requirements:

#### **4 Dissemination**

This Progress Report was submitted to the Town Council at a formal meeting on 7.2 The report was made available to the public via <u>https://www.pinevillenc.gov/planning-meetings-and-projects/</u>. Additionally, copies are available at the Charlotte Mecklenburg Storm Water Services office located at 2145 Suttle Avenue, Charlotte, NC 28208. For more information, please call (980) 314-3229.

# Review of Mitigation Actions

Action#	Mitigation Action	2021 Implementation Status Update
Pineville- 1	Seek grant funding to retrofit critical facilities and Town-owned facilities for improved resilience to all hazards with the use of the latest building materials and technology. This could include, but is not limited to: wind retrofits, low water consumption fixtures, leak detectors, backup generators, ignition- resistant materials, 320 or 361 compliant safe rooms, lightning protection, hail-resistant roofing, and anchoring fixed building equipment.	In progress: Mecklenburg County retroFIT flood hazard mitigation grant program rolled out in FY16 project to identify and partially fund various mitigation projects using techniques such as floodproofing.
Pineville- 2	Seek grant funding to install backup generators or quick connect hook ups for mobile generators on any newly constructed county/town critical facilities.	In Progress. New Town Hall facility that is under construction will have backup generator.
Pineville- 3	<ul> <li>Maintain continued compliance with the National Flood Insurance Program (NFIP) through implementation and periodic evaluation of the following higher regulatory standard (in addition to basic required compliance actions):</li> <li>a) Development standards linked to Community Floodplain (Future Conditions)</li> <li>b) Require critical facilities protection to 500- year flood levels</li> <li>c) Require parking lots to be elevated (no more than six inches deep in any parking space during Community Flood event)</li> <li>d) Require dry land access for new or substantially improved buildings (above Community Flood BFE)</li> <li>e) Levee restrictions</li> <li>f) Cumulative substantial damage improvement provision</li> <li>g) Prohibit basements below flood level on filled lots</li> </ul>	In Progress: Municipal Ordinance Updates to City, County, and town floodplain ordinances completed as Flood Insurance Rate Map revisions become effective. Staff participated in FEMA/NCDEM training E273 "Managing Floodplain Development through the National Flood Insurance Program".
Pineville- 4	In coordination with CMSWS, continue participation in the NFIP Community Rating System (CRS) with the goal of increasing CRS credit points to become a Class 5 community or better within five years.	Completed: Achieved CRS class 5 rating during the 2020 cycle verification.
Pineville- 5	Advertise and promote the availability of flood insurance.	In Progress: Annual "Floodplain Flash" newsletter distributed by USPS in November 2020. NFIP information is also presented through traditional media and social media throughout the year. NFIP information is also posted on the CMSWS website.

.Pineville- 6	Preserve lands subject to repetitive flooding.	In Progress. The Mecklenburg County Flood Risk Assessment and Risk Reduction Tool (RARRT) is now used to guide local mitigation program actions. Flood risk scores, mitigation priority scores and planning level mitigation techniques were developed for all buildings with property touching the floodplain with updated floodplain maps. This data is now used to develop and prioritize local mitigation efforts.
Pineville- 7	Continue to limit future development in identified flood hazard areas and prohibit new critical facilities from being located with the 500-year floodplain as required in the Town's flood damage prevention ordinance.	In Progress. Town maintains Zoning and Subdivision Ordinances to attain this goal. In process of developing a new Comprehensive Plan and updating the Zoning Ordinance. Zoning Ordinance has been completed and new Comprehensive Plan is underway.
Pineville- 8	Conduct cumulative impact analysis/studies for multiple development projects within the same watershed.	In Progress: Staff continues to require extensive studies for development projects within watersheds.
Pineville- 9	Continue to coordinate with CMEMO on enhancements to the Town's early warning system and procedures for imminent hazard events.	In Progress: Continue to coordinate with CMEMO on an ongoing basis.
Pineville- 10	On an annual basis, coordinate with Charlotte-Mecklenburg Emergency Management on a widespread public outreach activity to provide information on all natural hazards facing the area to local residents, including methods for preventing damages from hazardous conditions and how to respond when an imminent hazard threatens.	In Progress: All Hazards Advisory Committee (AHAC) Conference held 05-13-21
Pineville- 11	On an annual basis, coordinate with Charlotte-Mecklenburg Emergency Management to provide information on all natural hazards facing the area to local planning staff and elected officials. This should be combined with an annual progress report on the status of local mitigation actions as identified in the Multi-jurisdictional Hazard Mitigation Plan.	In Progress: All Hazards Advisory Committee (AHAC) Conference held 05-13-21
Pineville- 12	Acquire safe sites for public facilities, including schools, police and fire stations, etc.	Achieved/Ongoing. Belle Johnston Community Center can function as a safe site and any other current or future public facilities that qualify.
Pineville- 13	Develop early warning system for hazard events.	In April, 2021 Mecklenburg County in partnership with the Department of Homeland Security – Science and Technology Directorate implemented a real-time flood inundation mapping system utilizing real-time stream height data transmitted by recently installed low-cost flood sensors. This effort complemented the existing FINs system and early flood warning notification. The inundation mapping system is based on data developed from the H&H models, elevation certificate information and topography. The system provides real-time flood intelligence that can be shared with Emergency Management and other agencies to improve early flood

		warning, flood disaster response, and recovery. Two flood sensors were installed in the town of Pineville to warn town staff when flood waters are threating two of the towns critical facilities.
Pineville- 14	Develop traffic response plan addressing how to deal with traffic in a commercial area for ingress/egress in the event of a disaster or emergency.	Completed/Ongoing. The Police Department has traffic control measures in place. The Town is currently working on re-aligning a traffic light for better and more efficient traffic flow.
