Smart LED Street Lighting

PROGRAM NOTIFICATION

The Smart LED Street Lighting Program ("the Program") replaces existing Commonwealth Edison ("ComEd") owned street light fixtures (mercury vapor (MV) and high-pressure sodium (HPS)), located in participating municipalities, with Smart LED street lights.

This Program Notification letter is intended to provide you with information about the Program and provide guidance on what you can do to assist ComEd in its deployment of smart LED street lights in Poplar Grove ("municipality").

1. **Project Timeline.** ComEd has performed an inventory and assessment of the ComEd owned street lights in Poplar Grove. ComEd will verify the findings from the inventory review with the municipality and update the municipality's Fixture-Included street light account, as needed. ComEd will then notify the municipality approximately two (2) weeks prior to Smart LED street light fixtures installation.
2. **Street Lighting Charges.** The change from the existing fixtures to a smart LED fixture will change the cost of the Fixture-Included Lighting Delivery Service Charge as well as energy cost to operate the fixtures. The estimated Fixture-Included costs and estimated energy cost comparison of the existing street lights to Smart LED street lights will be provided upon completion of customer review.

   The fixture replacement cost will be offset by an Energy Efficiency credit equivalent to the fixture replacement cost. Effectively, the municipality will not incur any out of pocket costs to replace the fixtures.

   Note: In compliance with ComEd's Tariffs, the Municipality receives street lighting service under ComEd's Fixture-Included Lighting Delivery Class and remains at all times obligated to comply with the terms and conditions of ComEd's tariffs.

3. Municipality Obligations.

3.1. The municipality's support and assistance will be needed by ComEd, as requested, with access to the system and facilities, and municipal work permits as required to support the installation of Smart LED street light fixtures. The municipality will be required to complete the Customer Release form prior to Smart LED deployment. This form can be found as an attachment to this Smart LED Street Lighting Program Notification.

3.2. The municipality shall work with ComEd to resolve concerns raised by residents about installations of the Smart LED street lights.

4. ComEd Obligations.

Smart LED Street Lighting

4.1. ComEd will replace identified existing Cobra and NEMA head ComEd owned MV and HPS street lights, subject to the current Fixture-Included rate, with new, lower wattage Smart LED street lights.
