

February 3, 2022

**Client:** Village of Poplar Grove  
Attn: Don Sattler, Village President  
200 Hill Street  
P.O. Box 01  
Poplar Grove, IL 61065

2323 Fourth Street  
P.O. Box 483  
Peru, Illinois 61354  
815-224-1650  
800-659-4659  
**FAX 815-224-1688**

**Plant Type:** Wastewater Treatment Plants: North: Class II Sequential batch reactors (SBR).  
South: Class I Sequential batch reactors (SBR).  
Water Treatment Plants: Well Supply with Chemical Addition in all 3 locations

For the water system you will find attached the daily inspection and monitoring reports for each of the water plants and the distribution system testing record. For the wastewater side we have included the monthly DMR for both wastewater plants.

Outlined below are the processes and actions taken during December 2022 in Poplar Grove to improve the facilities equipment beyond required and routine maintenance, testing, inspection and reporting. At times we will also list upcoming needed improvements that may need attention by the Village.

#### Lift Stations:

- Cleaned all lift station floats and transducers.
- Ran and tested portable generators under load.
- We had a transducer go bad at Woodstock Rd lift station. A new one was installed, and we will be ordering a new one.

#### North WWTP:

- All standard monthly checks/maintenance/cleaning and procedures were completed.
- All personnel have taken safety classes on electrical safety, lock out tag out, confined space and emergency action planning.
- Main lift station has been working as it should.
- We tried to put the disk filter online for a test, but it wouldn't rotate. It will need some attention before it goes back online. One of the drive wheels is worn and will need to be replaced. We're working on pricing for that.
- We had the restraints break off one of the decanters. We fixed it temporarily until we can take the tank offline and drain it.
- Decanted digesters.
- Tested all emergency wash stations.

#### South WWTP:

- All standard monthly checks/maintenance/cleaning and procedures were completed.
- We have pulled the UV lights and cleaned all the sleeves. They are ready to reinstall when the time comes.
- One of the floating mixers broke away from its restraints. We hooked everything back up and it's working like it should.
- We had a blower go bad on one of the floating mixers. Sable is getting us a price for a new one.
- Transferred sludge to drying beds.
- We replaced some leaking air line connections.

- We had Sable come down to diagnose and fix issues with one of the floating mixers.
- Cleaned sand filter room.
- Tested all emergency wash stations.
- Decanted digesters.

**Water System:**

- Cleaned well houses.
- Changed pump head and chemical line at well 4.
- Changed injector and chemical line at well 3.
- Changed pump tubing at well 5/6.
- Had an issue with the furnace at well 5/6, which has been fixed and replaced.
- Tested the big portable generator under load.
- A few days ago we noticed the block heater wasn't working, so we had a guy from IEC come out and fix that.
- All required EPA testing has been done.

All operations and plant inspections have been performed by me or under my direct supervision. As always, if you have any questions concerning the above, please do not hesitate to contact me.
