Client: Village of Poplar Grove
Attn: Don Sattler, Village President
200 Hill Street
P.O. Box 01
Poplar Grove, IL 61065

Plant Type: Wastewater Treatment Plants: North: Class II Sequential batch reactors (SBR).
South: Class I Sequential batch reactors (SBR).
Water Treatment Plants: Well Supply with Chemical Addition in all 3 locations

For the water system you will find attached the daily inspection and monitoring reports for each of the water plants and the distribution system testing record. For the wastewater side we have included the monthly DMR for both wastewater plants.

Outlined below are the processes and actions taken during August 2024 in Poplar Grove to improve the facilities equipment beyond required and routine maintenance, testing, inspection and reporting. At times we will also list upcoming needed improvements that may need attention by the Village.

Lift Stations:

- We repaired the phone line at Collection Point lift station.
- We had Collins come out and clean out the grease from all the lift stations.
- We cleaned up the cabinets and put some mouse and rodent deterrent in them since the cooler weather is coming.
- Main lift station VFD replaced from when the storm hit.

North WWTP:

- All standard monthly checks/maintenance/cleaning and procedures were completed.
- Decanted digesters.
- Tested all emergency wash stations.
- We had the VFD/s replaced from the storm event. The SBR's are back working as they should.
- We're still waiting on parts to come for the valve replacement for SBR3.
- We had a blower lose a seal overnight and we came in to an alarm for an over current alarm on the VFD. Upon inspecting the blower room, we found a lot of oil under the blower that tripped. We disassembled that blower and the digester blower that started making noise and took them both in for inspection. I haven't heard back yet on what is wrong with them.
- Public works picked us up some sand for the sand filter rehab projects.
- We've been working with Gasvoda to try and get the disk filter fixed. NOVA, the company that made the filter, is out of business, so we can't just order the parts we need. **This is still ongoing. We received a quote from Gasvoda to repair the filter and make new parts**

2323 Fourth Street, PO Box 483 Peru, IL 61354

www.testinc.com

since they can't buy them. It was around \$7,000.

South WWTP:

- Decanted digesters.
- Generator PM and yearly inspection were done.
- All standard monthly checks/maintenance/cleaning and procedures were completed.
- Tested all emergency wash stations.
- We have received the sand filter pumps. We've installed them in one and they're back online and working better than it was.
- The other sand filter, we finished cleaning out the sludge, fixed the trolley system, replaced the wheels and it's ready to receive new pumps. When we were doing all this work, we noticed that some of the brackets that hold the back flow pump had gotten bent when the chain broke. We are putting together a plan to fix this.

Water System:

- Cleaned well houses.
- All daily checks have been completed.
- Cleaned well house.
- Rebuilt a leaking pump at well 4.
- Changed an injection line at well 3.
- We've been monitoring the Maganese and have not had any spikes.
- Midco has been here twice to inspect the towers. The first time, they had an issue with the ROV and the second time, had another issue that came up and they weren't able to make it out. They have rescheduled and were working with David on a time for that.

All operations and plant inspections have been performed by me or under my direct supervision. As always, if you have any questions concerning the above, please do not hesitate to contact me.

Form Approved OMB No. 2040-0004 expires on 07/31/2026

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.202(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the NCEES Executive Director.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.4 (f)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Sand comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.
