

Supplemental information for Item 7. Pre-Disaster Debris Management and Monitoring Services

Review of Proposals:

25% - Compensation (Cost)

20% - Qualification/Experience

20% resources and Availability

15% project Approach

20% FEMA reporting/reimbursement requirements

Debris Tech – Scotty Jones City of Bay City

I reached out to Scotty Jones, City of Bay City regarding DebrisTech. She told me “Great documentation ..very smooth ..no issues”.

TetraTech – Daryll Lesak City of Victoria

Wayne reached out to Daryll Lesak with Victoria who reported that the city just renewed their contract with Tetra Tech and was very pleased with their work. He stated that the software they used helped to ease his council’s concern with ease of reporting and tracking. Additionally, when Victoria got audited by FEMA there was question about certain items and Tetra Tech responded to FEMA within a couple of days and cleared the issue.

Kateryna also talked to Daryl and he said they worked with them during the Harvey, and Tetra Tech showed the online tool where City was able to track trucks and show where all tracks had been and how much debris was cleared etc. When it came to the FEMA audit Tetra Tech management sent all the requested documents to FEMA within a day and cleared the audit with no issues.

Kateryna spoke with Jamie Praslicka from the City of Angleton and highly recommend Tetra Tech to work with.

True North

True North had the pre-disaster contract with the City of Port Lavaca since 2019 and did some consultation for us on Category B Public Assistance work after Harvey – some of which I had to edit later to respond to RFI from FEMA. There were times during the pre-disaster contract period that we didn’t have much communication and they didn’t consistently check in on us before or after potential events.

Kateryna called Deer Park Jamie Galloway

He said that they worked with True North back in 2013 and were satisfied with their services and the team. Right now they have activated a Debris Management and Monitoring Contract as they were affected by Beryl and True North mobilized the team within 24 hours. They mentioned that True North was very sufficient with PA from FEMA.

Kateryna reached out to Brian Schneider from Morgan’s Point stated that they have been working with True North for more than 15 years and he would not want to work with anyone else but them. The service was great, no issues with reimbursement etc.

Azell Carter, Pasadena stated that they have been working with True North for a long time and described them as reliable, and trustworthy. General experience is positive.
