

AGENDA ITEM ANALYSIS

Project/Issue Name: 21-07 A Resolution of the City Council of the City of Republic, Missouri, Authorizing the Repair to the Submersible Pump that Powers the Flowrider Surfing Simulator at the Republic Aquatic Center.

Submitted By: Jared Keeling, Parks & Recreation Director

Date: February 25, 2021

Issue Statement

To repair the pump that powers the Flowrider surfing simulator at the Republic Aquatic Center.

Discussion and/or Analysis

The main pump that powers the Flowrider surfing simulator at the Republic Aquatic Center failed in 2020. In working with the staff of the Water & Wastewater Departments, we delivered the pump to Evans Enterprises, Inc. for an assessment and quotation for the necessary repairs. The estimated expense is \$32,755.00. Due to the nature of the repairs, the City is requesting this be a sole source supply purchase. We are requesting authorization of quoted amount plus an additional 15% contingency to cover any unforeseen circumstances.

The goal is to have the Flowrider attraction fully functional prior to opening day at the Republic Aquatic Center that is scheduled for May, 29, 2021.

Recommended Action

Staff recommends approval.
