Hello,

As we prepare for the coming years, I would like to begin discussions regarding the future structure of the Ambulance Service for 2027. A meeting has been scheduled for **December 16, 2025, at 6:00 p.m. in the County Board Room**. The purpose of this meeting is to review options for the administrative oversight of the Ambulance Service beginning in 2027. One key topic will be the possibility of the municipalities forming a district to oversee and administer the service.

As you know, there were significant challenges throughout 2025 concerning the structure and operation of the Ambulance Service for 2026. At this time, we have nine signed contracts returned, two pending signatures (with both municipalities expected to approve them at their next meetings), one municipality that has selected another service, and one that remains unresponsive.

Please note that the county will not discontinue service at the end of 2025 even if the final municipality does not sign its contract. However, due to the continued lack of response from that municipality, the county has begun evaluating additional long-term options.

**It is requested that one designated decision-maker from each municipality attend this meeting.**

Tricia Clements  
County Administrator

Richland County
