

CITY OF RICHLAND CENTER - AGENDA ITEM DATA SHEET

Agenda Item: Purchase of IPC CT50 Walk-Behind Floor Scrubber

Requested & Presented by: Darcy Perkins, MSS

Meeting Date: Finance Committee and Common Council on 04-21-2026

Committee Review: Due to the recent sale of existing equipment, there is a time constraint on this purchase to avoid a gap in operational capabilities. As a result, this item is being brought directly to Finance and Council. Staff have had ongoing discussions with the Public Works Committee regarding the strategy of selling older equipment with the intent of replacing it with more efficient, modern units, and the Committee has been fully supportive of this approach.

Background: The Public Works Department is proposing the purchase of an IPC CT50 walk-behind floor scrubber to support cleaning operations at the Community Center. The CT50 is a durable, high-productivity unit with a 20" cleaning path, 13-gallon tank capacity, and approximately 2.5-hour runtime, designed for efficient large-area floor maintenance. This purchase replaces recently sold equipment and ensures continued operational efficiency. The unit is expected to improve cleaning effectiveness, reduce manual labor, and provide reliable, consistent performance across facilities.

Department Recommendation: Staff recommend authorizing the purchase of an IPC CT50 walk-behind floor scrubber.

Financial Impact: ~\$3,800.00

Funding Source: Revenue from sale of surplus equipment; year-to-date balance: ~\$8,891.00

Requested Action:

FINANCE: Motion to recommend to the Common Council the approval of the purchase of an IPC CT50 walk-behind floor scrubber using funds from proceeds from the sale of surplus City equipment.

COUNCIL: Motion to approve the purchase of an IPC CT50 walk-behind floor scrubber using funds from proceeds from the sale of City equipment.
