Good morning Michael.

My apologies for the delay. It gets a bit nuts at the end of the calendar year so I am a bit behind.

Thanks again for your time and the opportunity. I have attached a quote showing the single offload dock we discussed along with the pricing for unlimited Cloud software for 1, 3 or 5 years. No real price break for doing multiple years up front so it would depend on how far in advance you wish to pay for it. I did also include pricing for the Cloud software and storage for in-car units should you get any of those as the pricing is a bit different due to there tending to be more video.

I also included the cost to have the software set up and device or devices configured as well as the training on the software which will be key in showing you how to offload, manage the video and do redaction when needed.

The other quotes I attached are to show what a new in-car system would cost as well as the current specs on the FZ-Toughbook.

Thanks again for the opportunity and please let me know if you have any questions at all. I will be out on appointments this afternoon but should be in the office all day tomorrow.
