

THE VILLAGE OF

RIDGEWAY

208 Jarvis Street | Suite A | Ridgeway, WI 53582

Iowa County, Wisconsin

Permit for Discharging of Septage and Holding Tank Waste

This permit for the discharge of septage and holding tank waste is issued by the Village of Ridgeway, hereinafter noted as PERMITTER, to:

Hereinafter noted as PERMITTEE, whose principal place of business is located at:

Address

Phone/Email

Which shall also be the location of record for billing and legal and administrative purposes. The corporate contact of record, who is Principal, Partner or Owner of the above referenced permittee and who as acted as a signatory to this permit shall have as a primary business location that referenced above unless they are noted as follows:

PERMITTEE shall use the following vehicles to discharge septage and holding tank waste to the Village of Ridgeway Waste Water Treatment Plant. Waste shall not be discharged from additional vehicles until they are added to this permit.

Vehicle#

Waste Capacity (gal)

Vehicle#	Waste <u>Capacity (gal)</u>

PERMIT CONDITIONS

As a condition of this permit, the PERMITEE agrees to abide by the following operation procedures:

1. All regulations in the PERMITTER's Sewer use ordinance shall be observed.
2. PERMITEE may only discharge waste at the receiving station facility located on the treatment plant premises, at **3708 County Hwy H, Ridgeway, WI** from 7:00 AM to 3:00 PM., Monday through Friday. Gate closure indicates waste is not being received. Unauthorized discharges during gate closures periods will result in prosecution. Discharges on holidays are not allowed. Exceptions to these times must be mutually agreeable and must be made at least (2) days in advance.
3. Discharge at any location other than the receiving station facility without prior written approval from the PERMITTER shall be deemed a violation of the PERMIT.
4. Discharges shall be subject to daily inspection and testing, and a determination of character and concentration of said wastes. The determinations shall be made by the PERMITEE as often as may be deemed necessary by the PERMITTER.
5. Upon discharge of each load, the PERMITEE shall provide a representative sample of the waste to be discharged for analysis. The cost of this analysis will be borne by the PERMITEE if waste characteristics exceedances are observed. Sample shall be collected from the truck discharge stream.
6. PERMITTER'S plant employees shall direct the discharger to cease the discharge of any waste determined to be incompatible with the wastewater system.
7. A sign in sheet, load manifest and sample bottles, supplied by the PERMITTER shall be completed and signed at the wastewater treatment plant prior to the time of each discharge.
8. The PERMITEE shall clean up all spills or other deposits resulting from their activity at any point on the premises of the PERMITTER. Failure to do so shall result in additional charges to the PERMITEE.
9. A monthly manifest record of all sites serviced by the PERMITEE may be requested by the PERMITTER. Failure to provide this record may result in suspension of

privileges.

In addition to observing the referenced operating procedures, the PERMITTEE further agrees to restrict discharges to the PERMITTER'S facility as follows:

The PERMITTEE shall not discharge:

- (1) Any pollutant or wastewater which will interfere with the operation or performance of the wastewater or sludge disposal systems. These general prohibitions apply to all users of the wastewater system. Unacceptable discharges are more specifically described as:
 - a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid or gas which creates a fire or explosion hazard in the water system, including, but not limited to, waste streams with a closed flashpoint of less than 140 degrees Fahrenheit or 60 degrees centigrade using test methods specified in 40 CFR 261.12.
 - b. Any water or wastes containing toxic or poisonous solids, liquids, or gases including herbicides and insecticides in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with the wastewater or sludge disposal systems or any treatment process; to constitute a hazard to humans or animals, or create a public nuisance in the receiving waters of the wastewater treatment plant; or to exceed the limitations set forth in any local, State or National discharge standards.
 - c. Any waters or wastes having a pH lower than 5.0, greater than 10.0 or having any other corrosive property capable of causing damage or hazard to structures, equipment or personnel of the wastewater system.
 - d. Solid or viscous substances which may cause obstruction to the flow in sewers, or other interference with the proper operation of the wastewater system such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, glass rags, feathers, wax, egg shells, grease, tar, plastic, wood, unground garbage, whole blood, paunch manure, hair and fleshing, entrails, and paper dishes, cups, milk, containers, etc., either whole or ground by garbage grinders.
 - e. Debris removed from municipal or industrial stormwater catch basins, commercial grease traps, or

industrial process or shop catch basins.

f. Any Radioactive wastes

(2) The following described substances, materials, waters, or waste shall be limited to discharge to the wastewater system in concentrations or quantities which will not harm the sewers, wastewater treatment process or equipment, will not have an adverse effect on the receiving stream, or will not otherwise endanger lives, limb, public property, or constitute a nuisance. The limitations or restrictions on materials or characteristics of water or wastewaters discharged at the treatment plant which shall not be violated without prior approval of the PERMITTER are as follows:

- a. Wastewater having a temperature higher than 150 degrees Fahrenheit (65 degrees centigrade).
- b. Wastewater containing more than 100 milligrams per liter of petroleum oil, non- biodegradable cutting oils grease or other products of mineral oil origin.
- c. Water or wastewater containing floatable oils, fat or grease of animal or vegetable origin in excess of 100 milligrams per liter.
- d. Any garbage that has not been properly shredded, with no particle greater than ½ inch in any direction.
- e. Any waters or wastes containing iron, chromium, copper, zinc, silver lead, mercury, and similar objectionable or toxic substances to such a degree that any such material received in the composite wastewater at the wastewater treatment plant exceeds the limits established by the PERMITTER for such materials.
- f. Any water or wastes containing color producing or odor producing substances exceeds limits which may be established by the PERMITTER.
- g. Water or wastes containing substances which are not amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of the agencies having jurisdiction over discharge to the receiving waters.
- h. Any water or wastes which result in the presence of toxic gases, vapors or fumes within the POTW in a quantity that may cause acute worker health and safety problems, form suspended solids which interfere with the which wastewater system, or create a condition deleterious to structures and

treatment process.

1. Materials which exert or cause:
 1. Unusual BOD, chemical oxygen demand or chlorine requirements in such quantities as to constitute an excessive load on the wastewater treatment plant, in the exclusive discretion of the PERMITTER.
 2. Unusual concentrations of inert suspended solids such as, but not limited to, fullers earth, lime slurries, and lime residues, or dissolved solids (such as, but not limited to, Sodium sulfate)
- J. Water or waste containing chlorine above 2 mg/l

APPLICATION AND FEE

All commercial and private sanitary waste haulers shall secure a permit from the PERMITTER authorizing the discharge of septage and holding tank waste to the wastewater system.

Applications for permits, obtained at the wastewater treatment plant, shall contain such information as the PERMITTER determines is necessary, including the number of vehicles used to transport septage, the capacity of each vehicle, and estimated volume to be transported for treatment by day and per week. Permits shall be issued for a one-year period or portion thereof, and shall expire on December 31 each year.

Applications for renewal permits shall be made by October 31 each year. A fee of One Hundred (\$100) shall accompany each application for a new or renewal permit. A late fee of (\$5) Five dollars shall be assessed for renewal applications filed after October 31. All fees shall be paid prior to issuance of any permit.

SERVICE CHARGES

All septage and holding tank waste discharged into the wastewater system shall be billed in accordance with the rates set annually by the PERMITTER. Additional charges may be levied for wastewater discharges of unusual strength; damage to the wastewater system, its structures or apparatus' or restoration of the discharge area required as a result of spills or other hauler activities.

Services charges shall be billed to the PERMITTEE on a monthly basis, and shall be due and payable within forty-five (45) days of the invoice date. Unpaid balances remaining beyond the forty-five (45) days of the invoice date shall be assessed a charge of 1 ½

percent per month for each month or fraction thereof that they persist. In addition, the PERMITTER may, without notice, suspend the discharge privileges of the PERMITTEE if an invoice remains unpaid for 45 days after the invoice due date.

TERMINATION OF PERMIT

This permit shall naturally expire on December 31 each year. In addition, the PERMITTER reserves the right to revoke the permit for violation of any of the terms of the permit by the PERMITTEE, due to failure of the treatment facility to meet its WPDES Permit requirements, or for any other cause to be determined by the PERMITTER.

COST PER 1000 GALLONS

Twenty-Five (25\$) per thousand gallons of holding tank waste Fifty (50\$) per thousand gallons for Septic Waste

If the PERMITTER deems it necessary to raise the dumping cost, all PERMITTEES will be given a 60-day notice before the rate increase.

IN WITNESS WHEREOF the PERMITTER has issued the permit, and the permittee agrees to abide by the terms of this permit.
