Public Comment

- Robert Montiel: You got to give us easement to get to our backyards. Gordon towed one vehicle off my own property which is illegal. Also, Gordon said I can't park in the back yard because I'm trespassing through city property. I've done my research there has to be an easement and as long as I am parked on my property it should be allowed.
- The Commission began a discussion and explained they would not be able to speak to him about this, he would need to approach the City Manager Dr. Moore for more help with the matter.
- Secretary Adair said after reading the paper and the cannabis ordinance, the amount of fossil fuel used to process it is exorbitant and knowing that and that we cannot prevent cannabis here, we should try to create an ordinance on having them use the least possible amount of carbon footprint to produce it.
- Mr. Gordon said we have to remember that we cannot place any restrictions on them that we could not place on a bar.
- Secretary Adair said they need to grow it outside; the reason they started growing in grow houses was because it was illegal; the other states are pushing for ways for people to grow it outside because of the carbon footprint. He then said there are products they can buy that use less wattage.
- Mr. Gordon said he agrees but he does not think that it will be allowed.
- Vice-chair Thompson said there are unintended consequences of growing it outside would be security, taller fences, and more crime. The discussion continued.

- Secretary Adair said he would like to draft something and send it to the manager to send to the lawyer.
- Mr. Gordon said there is nothing wrong with asking the lawyer is something can be done, but he feels like we cannot do that. He then said he understands that no one has applied for a cannabis business and if we can do anything
