Background

The California Building Standards Commission (CBSC) is an independent commission within the State Consumer Services Agency responsible for reviewing, adopting, and publishing building standards for the State of California. Every three years, the CBSC adopts a compilation of building regulations referred to as the California Building Standards Code (California Code of Regulations, Title 24). Through the code adoption process, the CBSC

selects and approves a set of model codes. Inclusive in these regulations are the California Building, Mechanical, Plumbing, Electrical, Existing Buildings, Fire, Energy, Residential Building, Historical Building, and Green Building Codes. Participating State agencies, such as State Fire Marshal (SFM), Division of the State Architect (DSA), Housing and Community Development (HCD), and Office of Statewide Health Planning and Development (OSHPD), have an opportunity to amend the code for the occupancy groups under their respective authorities.

Local governments or jurisdictions can also modify the code to add more restrictive provisions based on their specific local geologic, climatic, and topographic conditions to protect their communities. Any local amendments to the above mandated codes must be more restrictive than the State Building Standards Code and must be substantiated with findings, per California Health & Safety Code Section 17958. The administrative provisions of the code can be modified without specific justification based on local conditions.

The 2025 Codes become effective on January 1, 2026; however, the specific code addition applicable to a building project is established by the building permit application date. Therefore, projects submitted for a permit on or after January 1, 2026, must be designed and constructed to the 2025 edition of the California Building Standards Code. The specific codes mandated for effectiveness in January 2025 by the State of California are as follows:

- 2025 California Building Code Volumes 1 & 2
- 2025 California Mechanical Code
- 2025 California Plumbing Code
- 2025 California Electrical Code
- 2025 California Existing Buildings Code
- 2025 California Fire Code
- 2025 California Energy Code
- 2025 California Residential Building Code
- 2025 California Green Building Standards Code
- 2025 California Historical Building Code

Included with the adoption of the California Building Standards Code is the 2024 International Property Maintenance Code (IPMC). This model code provides the City authority to abate structures that are imminent hazards to the public in a quick and efficient manner. The model code includes definitions of terms for enforcement, for the integrity of structural elements of buildings, and specific hazards. These definitions are not included in the other standard codes.
