AND CODE ENFORCEMENT**

October 20, 2022

Michelle Tyler  
Director of Planning  
Town of Randolph  
41 South Main Street

Dear Ms. Tyler,

The Randolph Fire Departments Office of Fire Prevention and Code Enforcement has reviewed the application submitted by Nitsch Engineering for paper or private street improvements to Dow Street and Mitchell Street. Per the plan submitted the proposed roadway layouts and intersection corners have been designed to accommodate the Town of Randolph's emergency vehicles. As referenced on page [1] TM-2 of the submitted plan, minimum required widths and clearances have been established and meet Massachusetts Comprehensive Fire Safety Code. The proposed plan would greatly improve fire department access to Dow Steet and the proposed Lyons Elementary School project. Any changes to the proposed plan that would impair or impede accessibility are discouraged as this proposal meets only minimum requirements. We ask that the Planning Board communicate any further discussion in relation to fire department accessibility to our Office.

Respectfully,

Michael J. Austrino

Fire Captain

Office of Fire Prevention and Code Enforcement
