

# **AGENDA ITEM SUMMARY SHEET**

## **City of Rollingwood**

**Meeting Date: January 21, 2026**

**Submitted By:**

Staff

**Agenda Item:**

Discussion and possible action on installation of a valley gutter at the intersection of Vale Street and Bettis Boulevard and other water diversion structures

**Description:**

Runoff coming down Bettis Boulevard (and Vale Street) does not continue straight across Vale Street, but rather curves northeast and then crosses Vale towards the front walk of 305 Vale Street. During heavy rains, the runoff can top the curb and run into the yard. This has been an issue for nearly 20 years, and appears to be getting more frequent. Installation of a valley gutter or other diversionary structure to ensure water crosses Vale at the intersection and continues down Bettis appears needed.

**Action Requested:**

To discuss the issue and provide direction to staff on what action(s), if any, to take.

**Fiscal Impacts:**

The fiscal impact of this item depend upon Council's direction.
