

Burr Oak - 4

Botanical Name: *Quercus macrocarpa*
Plant Type: Trees (Large)
Native To: Both Blackland Prairie & Edwards Plateau
Plant Height Min: 50ft
Plant Height Max: 70ft+
Plant Spread Min: 30ft
Plant Spread Max: 50ft+
Light: Sun
Evergreen/Deciduous: Deciduous
Seasonal Interest From: Spring
Seasonal Interest To: Spring
Plant Color: Green
Seasonal Feature: Fruit
Water Needs: Very Low
Comments: Large, majestic tree, very adaptable; provide plenty of space and deep soil; moderate growth rate; prune to shape or raise canopy if needed

Monterrey Oak - 4

Native from Val Verde County in west Texas south through Mexico to Guatemala, Mexican White Oak is resistant to oak wilt and is a hardy evergreen oak tree spreading to 60' feet wide as it matures and a height of 80'.

Chinquapin Oak - 5

Botanical Name: *Quercus muhlenbergii*
Plant Type: Trees (Large)
Native To: Both Blackland Prairie & Edwards Plateau
Plant Height Min: 50ft
Plant Height Max: 70ft+
Plant Spread Min: 30ft
Plant Spread Max: 40ft
Light: Sun
Evergreen/Deciduous: Deciduous
Seasonal Interest From: Fall
Seasonal Interest To: Fall
Plant Color: Yellow
Seasonal Feature: Foliage
Water Needs: Low
Comments: Stately form; provide deep soil; moderate growth rate; prune to shape or raise canopy if needed

TX Red Bud - 3

Botanical Name: *Cercis canadensis* var. *texensis*
Plant Type: Trees (Small)/Large Shrubs
Native To: Edwards Plateau
Plant Height Min: 15ft
Plant Height Max: 20ft
Plant Spread Min: 10ft
Plant Spread Max: 15ft
Light: Sun/Part Shade
Evergreen/Deciduous: Deciduous
Seasonal Interest From: Spring
Seasonal Interest To: Spring
Plant Color: Pink
Seasonal Feature: Flower
Water Needs: Low
Comments: Mexican variety has small wavy leaves; Texas variety has leaves that are larger and less wavy; provide well-drained site; Eastern Redbud not recommended; prune to shape, raise canopy or remove suckers

Mexican Plum - 1

At maturity, a Mexican plum tree (*Prunus mexicana*) typically reaches a width of **15 to 25 feet**. [🔗](#)

Here's a more detailed look at its characteristics: [🔗](#)

- **Height:** 15 to 30 feet
- **Spread:** 15 to 25 feet
- **Growth Rate:** Relatively slow, around 1 foot per year
- **Foliage:** Deciduous, with yellow-green leaves that turn orange in the fall
- **Flowers:** Fragrant white or pale pink flowers in early spring
- **Fruit:** Edible plums that ripen in mid to late summer, changing from green to purple-red
- **Hardiness:** Cold and drought tolerant
- **Sunlight:** Prefers full sun to partial shade
- **Soil:** Adaptable to different soil types, but prefers slightly acidic to neutral soil
