

AGENDA ITEM SUMMARY SHEET

City Council City of Rollingwood

Meeting Date: November 19, 2025

Submitted By:

Staff on behalf of Sara Hutson

Agenda Item:

Discussion and possible action to establish a requirement for parking plans or permits for events and construction activities to designate where multiple vehicles will be parked in the city

Description:

The City of Rollingwood does not currently require parking plans or permits for events or construction activities that involve multiple vehicles parking within City limits. As a result, large gatherings, private events, and active construction sites can create on-street parking congestion, limit access for residents and emergency vehicles, and disrupt traffic flow and neighborhood safety.

Establishing a requirement for parking plans or permits would allow the City to proactively manage and mitigate these impacts by ensuring that applicants identify designated parking locations in advance, maintain clear access for emergency services, and minimize inconvenience to nearby residents.

Action Requested:

Discuss and take action on establishing a requirement for parking plans or permits for events and construction activities to designate where multiple vehicles will be parked in the city.

Fiscal Impacts:

No Fiscal impacts presented at this time.
