Makayla,

Please forward to the Park Commission.

As a former member of the Park Commission, I was part of the team that created the Master Plan. During the drafting process, we looked very closely into creating a separate dog park to help resolve the conflict between "baseball and the dogs." We had plans drawn that showed how the space on the north end of the park could be used as a dedicated dog park. The issue we encountered was the RCDC's unwillingness, at the time, to fund any of the initiatives within the Master Plan. (Please note, the Master Plan was primarily created as a means to solicit State & Federal grants to pay for the park's initiatives. A formal plan was required and precursor to ask for funding.) Given the RCDC's recent willingness to consider funding the construction of a dedicated dog park, I am asking the Park Commission to please begin looking into the viability of separating the dog park from fields 3,4 & 5.

Lastly, please look into the repair of the water fountain. I have checked online with the company that Jackie Bob (Izzy's predecessor) bought the water fountain from and spare parts are available.

Thank you.

David Bjork
