

AWR Monthly Operating Report
City of Rollingwood
September 18, 2019

AWR Water & Wastewater Services Summary

Lift Station Monitoring

AWR personnel made site visits and monitored the City of Rollingwood's lift stations five (5) days per week for the month of August 2019. In addition, AWR responded to emergency calls 24 hours per day/7 days per week.

Billing & Collection

AWR billed 596 active customers during this reporting period. All amounts collected were deposited in the City's depository bank. Delinquent accounts and high user notices were processed based upon the City's approved policies, and once approved, were mailed to customers.

- *Uncollected Arrears Accounts* – Please note the utility billing uncollected arrears accounts as of August 2019 are currently the following, including uncollected final accounts (see attached report):
 - **60-Days Delinquent** \$2,477.43
 - **90-Days Delinquent** \$1,480.70
 - **Excess of 120-Days Delinquent** \$22,246.94
(includes payment plans)

Water System

1. *#8 Inwood Circle (Water Leak Repair)* – AWR, at the direction of the DPW, assisted with a water leak repair near #8 Inwood Circle. AWR assisted the City staff with isolation of the area, City staff conducted repairs to the line, and AWR flushed the lines and obtained a required bacteriological sample for analysis at an independent lab.

City staff notified all affected customers of a Boil Water Notice. A "clear" sample result was received the next business day from the lab, AWR updated City staff, and City staff updated the affected customers the Boil Water Notice was rescinded.

2. *Utility Billing (Donation Line Item)* - At the direction of the City Administrator, AWR worked with its utility billing software staff to create a "mock bill" which would include a donation line item for the City. A copy of the "mock bill" was provided to the City and approved by the City Administrator. We have submitted the approved "mock bill" and anticipate a proposal for the necessary software changes by October 2019 City Council meeting.

Lift Station Repairs & Maintenance

1. *Lift Station Cleaning* - As directed by the City's DPW, AWR conducted cleaning and wash down of all lift stations #1 thru #7 during daily operations to help with the breakdown and removal of excess grease build up. All debris, solids, and grease which could be obtained was removed from the top of the lift station by AWR staff to help reduce the need for contractors to conduct a vactor pump and haul, which is typically conducted 2-4x per year depending on activity of a station. Quarterly would be the most frequent, and at least on 2x per year basis minimum. All materials were disposed of and each station was placed back in service after cleaning.
2. *Lift Station #1 (Dellana)* - AWR coordinated with generator contractors to obtain a preventative maintenance plan for annual/bi-annual/tri-annual services for the City. The proposals received by AWR have been provided to the City's DPW and Engineer for review.
3. *Lift Station #2 (Hatley)* - At the direction of the City's DPW, AWR coordinated with contractors and the City Engineer to obtain proposals for repair or replacement of one (1) pump in the station. Proposals were provided to the City's Engineer and DPW for review and approval. Upon consideration the City's DPW authorized the rebuild of the existing pump versus purchase of a new pump which had a 14-16-week lead-time.

AWR was then directed by the DPW to coordinate the installation, integration, and testing of the rebuild pump to place the station back in service with both pumps in rotation.

4. *Lift Station #4 (Rockaway)* – At the direction of the DPW, AWR coordinated with contractors to schedule the installation of a new lift station pump for this location which was purchased by the DPW. AWR was directed to coordinate the installation contractors, assist with the installation of the components, and coordinated the install of a new power controller and soft start equipment to integrate the new pump. Once installation of the new pump was complete, we tested the rotation of the pumps successfully, soft starts operated properly, and the station was placed back in normal operation.

Drought Contingency Plan

Current combined storage level in Lakes Travis and Buchanan is 1.828 million acre-feet, or 91% of total capacity. Lake Travis is currently at 90% of total capacity, or 1.021 million acre-feet.

"Stage I Watering Restrictions", commonly referred to as once-per-week yard watering in accordance with the City of Austin's watering restrictions, are currently in effect in the City.

Water Loss

August 2019 Water Loss – Please note the City DPW has determined the City of Austin's master meters which measure water pumped into the City of Rollingwood may not be reading accurately. The City DPW is currently working with the City to schedule any necessary testing to ensure they are reading accurately. The City's DPW anticipates having updated master meter reads available next month for the water loss calculation to be conducted. AWR will also continue to assist the City's DPW as needed regarding water accountability for the City.
