## Viking Fence Co. – Cedar Grading Standards GENERAL DESCRIPTION – PICKETS ONLY

**We carry the following grades - mill direct, so we can control the quality!**

Viking Fence Co.'s Grading Standards are based on the published West Coast Lumber Grading Rules, Revised Jan 1, 2004.

Boards are predominantly green Western Red Cedar. Green is defined as still carrying moisture. Occasionally, we will carry a kiln-dried Western Red cedar. We mill/specify various grades. In layman terms, the characteristics of our lumber pickets are as follows:

### **Viking Select Tight Knot (STK) – Premium**

Viking's STK Western Red Cedar Board is our top-of-the-line offering. ¾" thick board or thicker (when available). Select Tight Knot means knot size is limited in size and sound. **Both sides are graded to the same standard** – so same beauty on both sides. Available in S1S2E (Smooth 1 Side, Smooth 2 Edges) or rough-sawn. 6" Nominal widths available in 4, 5, 6 and 8 foot lengths. Best picket on the market – bar none!

### **Viking Fence Import Island Cedar (aka "Sugi")**

A new species that is gaining popularity (Japanese Cedar/Japanese Redwood). Not to be confused with an inferior species from China that is actually a fir. Mostly available in 6' heights. Viking does stock 8' in limited quantities. **Grade is tight knot grade to the same beauty on both sides.** Kiln-dried for added stability. Decay resistant. Great looking if stained. We recommend installing on 3 horizontal rails. Viking fence is the only company stocking a ¾" thick version.

### **Residential Grade - Quality**

This Residential grade of Western Red Cedar meets common fencing grade characteristics. The board is an S1S2E or rough-sawn product and ¾" thick. A small percentage of the boards will have/develop knot holes. **The milled side is the graded side. The reverse side may have characteristics approximately one grade lower than the face.** Available in 4" and 6" nominal widths and in 4, 5, 6 and 8 foot lengths.

### **No. 3 Fence Board. Rustic/Builders-grade**

Lumber of this grade is suitable for economy grade fencing and permits all characteristics which do not interfere with the use of the piece. Knot holes and other aesthetic defect will be present. The key characteristic in this board is functionality. This board is an S1S2E or rough-sawn product.

FOR MORE DETAILS ON OUR GRADING STANDARDS, PLEASE SEE OUR DETAILED STANDARD GRADING SHEET.

## PRIVACY DEFINITIONS/SPECIFICATIONS FOR WOOD FENCE STYLES

"Full Privacy" - the only way to achieve 100% privacy involves a board-on-board installation to cover all gaps between pickets.  
"Privacy Fence" – a common term for a side-by-side fence construction that at first yields almost full privacy, but as moisture evaporates from the fence pickets, gaps do form between each fence picket. This is the most common type of fence construction.  
"Semi-Privacy" – commonly used in custom fence styles, both vertical and horizontal, and defined by pre-determined spacing between each fence picket.

## WHEN YOU THINK FENCE, THINK VIKING!

**Warranty and Terms:** One-year materials and workmanship. This proposal is good for 5 days unless extended by salesman in writing. All work done in a professional manner by experienced, insured fence erectors. Viking Fence is relieved of all liability related to fence location and property lines. Customer is responsible for obtaining all necessary permits, except where noted. Viking will not be responsible for damage to under-ground lines or pipes. All Materials are the property of Viking Fence until paid in full. For full warranty details please visit <https://www.vikingfence.com/warranty-certificate/>.

Please review your warranty certificate for proper care and maintenance of your fence.

### **Standard Viking Payment Terms:**

Residential: 50% down, balance due upon completion.

Large Commercial/Gov't Jobs: (requires credit app), Net 42 (per Texas Prompt Payment Statute)

All accounts past due will be charged 1.5% monthly interest (as allowed per State Law.)
